

I think NAB petition 04-160 is a bad idea. As an american citizen I have the freedom of choice. With that freedom I choose to to listen to XM radio (which I pay for), so they have the right to offer me services. It is time for regular radio broadcasters to make changes to their services. Their free ride of being the only choice is gone, they are starting to realize that XM with 2 million subscribers and growing is a real threat to them. Since I have had XM (Nov. 2001) I do not listen to regular radio, they have to many commercials and play the same 50 songs every day.
XM nation is alive and growing
